Swatara. (Farr 1918) Blue and violet. Orange beard	.25
Tineae. (Species) Pale lavender-blue25
Tintallion. (Sturt. 1921) White with falls tipped purple	.75

We consider it important for customers to see the Irises before ordering them; there are so many varieties, differing very slightly in tone or carriage.

In the parentheses will be found the name of the originator, and the year of introduction.

In the description, "S" refers to the three standing petals, "F" to the three that droop.

Many varieties are not listed this year, as we do not wish to take too many from our garden, but some that are unlisted may be sold after blooming season if they have increased sufficiently.

Our 1928 catalogue gives more detailed description, and a few copies are still available.

We are listing four of our new introductions for the first time.

No collections are listed this year, but we shall on request quote collections for \$2.00 or over.

While our surplus lasts we shall sell mixed rhizomes, and unnamed seedlings, twenty for \$1.00.
